

Isuzu DMax

No Key Lock

2012—2016

Product Code 2927NKL

If you require any help with installation please call us on +44 (0)1386 831574

or eMail to info@eagle4x4.com

1) Please check you have all the required parts before starting installation:

- 1 x baseplate and actuator kit
- 1 x wiring loom
- 8-10 x cable ties
- 2 x scotch locks - please note that soldering is recommended
- 1 x convoluted tubing - to protect wiring harness

2) You will need the following tools:

- Screwdriver (to remove tailgate panel)
- Metric socket set or screwdriver (to remove tailgate handle)
- Soldering equipment
- Pliers (to crimp scotch lock wire connectors - *optional*)

3) Open tailgate; undo 10 screws and remove metal panel to allow access into the inside of the tailgate

4) Remove the two screws that hold the tailgate handle into the tailgate. Also remove the right hand side locking rod

5) Slide base plate into place

6) Attach the motor to the base plate. Photo shows the arrangement out of situ

7) Bolt base plate into position using the screws removed in step 4 above and re-attach the locking rod

8) Connect wiring loom to the actuator:
Red to Red and Black to Blue

9) Feed cable out of the tailgate and under the vehicle chassis. Feed into the cab through the floor on the driver's side. Use the plastic convoluted tubing to protect the wire between the tailgate and chassis

9) Remove the door sill guard on the driver's side to expose the vehicle's wiring loom

10) Solder the wiring loom into vehicle electrics. You may use the Scotch Locks provided but soldering is recommended. Please note that we advise that any connection is appropriately and securely covered with suitable insulation material

Eagle1 Lock	Vehicle Loom
Red	Blue
Black	Blue with Red trace

11) Test the kit by clicking the central locking and checking that the tailgate locks and unlocks. Do not click continuously since the motor may over heat and fail. If everything works, replace the door sill guard and tailgate cover

Eagle4x4 recommends that installation is done by a qualified auto electrician. Any electrical faults due to improper installation will not be warranted by Eagle4x4
